DETAILED ACTION

Response to Preliminary Amendment

This Office Action is in response to applicant's preliminary amendment filed on July 1, 2003. Claims 1-26 have been cancelled. Claims 27-38 are newly added claims.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 27-33, drawn to a valve assembly, classified in class 251, subclass 149.1
- II. Claims 34-38, drawn to a surgical valve assembly, classified in class 604, subclass 27.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are not related to each other.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Art Unit: 3743

During a telephone conversation with Ms. Kimberly Perry on November 23, 2004 a provisional election was made without traverse to prosecute the invention of Group II, claims 34-38. Affirmation of this election must be made by applicant in replying to this Office action. Claims 27-33 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention.

Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Kimberly Perry on November 23, 2004.

The application has been amended as follows:

Cancel claims 27-33.

In claim 35, the term "claim 30" has been replaced by "claim 34."

In claim 36, the term "claim 33" has been replaced by "claim 34."

Allowable Subject Matter

Claims 34-38 are allowed.

Art Unit: 3743

The following is an examiner's statement of reasons for allowance: the art of record when considered alone or in combination neither renders obvious a surgical valve assembly for sealed reception of an elongated object, comprising:

(a) a valve body having at least one opening configured and dimensioned to permit entry of an elongated object and defining a central longitudinal axis, the valve body including an internal recess;

(b) a seal member disposed within the internal recess of the valve body, the seal member including at least one substrate and a plurality of flexible bristle members extending radially inwardly relative to the at least one substrate, the bristle members being arranged to define an aperture through the seal member for permitting passage of the elongated object therethrough in substantially fluid tight relation therewith, the bristle members being further arranged to form a taper to facilitate insertion of the elongated object, each bristle member being adapted to be displaced relative to the longitudinal axis to facilitate expansion of the aperture of the seal member upon entry of the elongated object therein; and

(c) an access member extending from the valve body, the access member dimensioned for positioning within body tissue and adapted to provide a path for passage of the elongated object.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
